NOTICE OF AMENDMENT

OVERNIGHT EXPRESS MAIL

April 12, 2012

Mr. Jimmy D. Staton
Executive VP & Group CEO
NiSource Gas Transmission & Storage
801 E. 86th Ave
Merrillville, IN 46410

CPF 1-2012-1010M

Dear Mr. Staton:

During the week of September 19, 2011, representatives of the Pipeline and Hazardous Materials Safety Administration (PHMSA) pursuant to Chapter 601 of 49 United States Code inspected Columbia Gas Transmission's (Columbia) procedures for corrosion control in Milford, Pennsylvania.

On the basis of the inspection, PHMSA has identified the apparent inadequacy found within Columbia's plans or procedures, as described below:

1. 192.605 Procedural manual for operations, maintenance and emergencies

Each operator shall include the following in its operating and maintenance plan:

(b) Maintenance and normal operations. The manual required by paragraph (a) of this section must include procedures for the following, if applicable, to provide safety during maintenance and operations.

(2) Controlling corrosion in accordance with the operations and maintenance requirements of Subpart I of this part.

Columbia's procedures for controlling corrosion were inadequate in that they failed to identify the qualifications for individuals who perform design, construction, operations or maintenance functions, required by § 192.605(b)(2).
