Subject
Response to April 18, 2007 **Notice of Amendment CPF 2-2007-6007M**

Dear Ms. Daugherty:

On November 28 -30, 2005, representatives of the Pipeline and Hazardous Materials Safety Administration (PHMSA) inspected South Wilmington Pipeline's (SWP) procedures for Operations and Maintenance in Wilmington, North Carolina. Pursuant to this inspection, we received a Request for Specific Information (RSI) from PHMSA dated December 29, 2005. This letter was received on January 4, 2006. The RSI consisted of 10 requests for evidence of procedures and 5 requests for evidence of recordkeeping. On March 14, 2006, PHMSA received the response materials from South Wilmington Pipeline which included revised (1/31/2006 revision 3) sections of South Wilmington's procedures.

As a result of PHMSA's review of the response materials, South Wilmington Pipeline received a Notice of Amendment **CPF 2-2007-6007M** on April 18, 2007 that indicate 19 inadequacies were identified within South Wilmington's procedures. South Wilmington Pipeline has reviewed the Notice of Amendment and has prepared this response for your review. This response has 10 sections of which each will contain; the regulatory citation and audit finding, SWP's response (in blue), and copies of the applicable documents/procedures from the O&M Manual.

If you have any questions concerning this response, please contact me at (910) 799-0144 Ext. 1.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Donnie Cannon', written over a faint, illegible background.

Donnie Cannon
Operations Superintendent
