

Quarterly Report

Date of Report: *January 27, 2006*

Contract Number: *DTPH56-05-T-0006*

Prepared for: *Government Agency: DOT and PRCI*

Project Title: *Pipeline Assessment and Repair Manual (Prj#179)*

Prepared by: *CC Technologies Inc.*

For quarterly period ending: *December 31, 2005*

Public Page:

CC Technologies completed its second quarter of work on developing a software tool to aid in the selection of pipeline repairs and act as a supplement the PRCI Pipeline Repair Manual. A preliminary version of the software has been prepared – its release is on hold pending an additional revision to the repair manual. The software is designed to provide a user-friendly interface for identifying repair alternatives for various defects and anomalies using logic and flow diagrams. It also provides basic information on each repair technique referenced in the software.
