

To: Mr. Sam Hall and Ms. Maria Munoz

From: Chad Kaiser Stutsman County Sheriff

Ref: Pipeline safety grant #DTPH56-10-G-PHPT15

The pipeline safety grant has been beneficial to Stutsman County as a whole. We were able to purchase mobile data terminal software that was compatible with our dispatch. The grant also allowed us to put all the pipeline information on our map software which the whole county has access to. All this information is able to be accessed by the mobile data terminals. We can see on the map where the pipeline is in the County.

This information benefits all responders in Stutsman County and surrounding counties. In an emergency this information will be accessible to responders instantly. This project went very well and is used every day. That is the good part of this project. The items purchased in this grant are being used every day. This was not a project that will be put away and forgotten or when an emergency comes people will forget how to use it. This project is used every day and beneficial to all of the responding agencies.

All the work has been completed in this grant project. The project went well and is still running very well. The project was completed within the year and was on schedule.

I want to thank you for this great opportunity that you gave us to be more efficient and better equipped to handle emergencies. Everything helps when the time is counting down. Stutsman County thanks you for your assistance in our grant project with pipeline safety.

Sincerely,

Chad Kaiser
Stutsman County Sheriff
