

224 S. Jefferson Street, Perry, Florida 32347

850-584-7940

September 21, 2011

To Whom It May Concern:

The GIS mapping was completed in July 2011. Magnolia River was awarded the bid.

Magnolia River created a digital database (GIS) of the existing gas distribution system. They installed all software and provided on-site training for personnel on how to update and add to the database as the distribution system expands or changes. The City of Perry is very pleased with this system and has found it to be very beneficial.

GIS Mapping Grant:

- Helps City meet its DIMP Requirements.
- Enables office personnel to help field crews to locate valves and lines in system.
- Improves response time in locating and emergency repairs.
- Aids in achieving our goal of providing enhanced information to field crews.
