PHMSA Pipeline Compliance Registry

**RE: CPF 3-2020-5009, Activity ID 17-158844S – RECORD CORRECTION**

Dear PHMSA Pipeline Compliance Registry:

On December 22, 2021, Central Region inadvertently sent a closure letter to compliance requesting closure of the above-referenced enforcement action. On December 21, 2021, in the Associate Administrators letter transmitting the Decision on the Petition for Reconsideration stated that the enforcement action will be closed upon Compliance Order completion. After a review of the Compliance Order and the documents submitted by the operator, the Compliance Order remains unsatisfied. The operator provided its updates for enforcement Items 1, 7 and 9; however, it requested a time extension to submit updates for Item 10 (form Line 6a MP 82 granted for two months and deadline extended to 6/30/24 for Line 6a MP 97). The Region granted the Operator's request and extended the deadline to June 30, 2024.

Accordingly, it is hereby requested that the PHMSA Compliance Registry reopen the enforcement action for CPF number 3-2020-5009, Activity ID number 17-158844S until such time as the operator has complied with the terms of the Compliance Order.

Thank you in advance for your assistance.

Sincerely,

Gregory A. Ochs  
Director, Central Region, OPS  
Pipeline and Hazardous Materials Safety Administration
