Dear Fisette:

On May 5-8, 2008, a representative of the Pipeline and Hazardous Materials Safety Administration (PHMSA) pursuant to Chapter 601 of 49 United States Code inspected your transmission pipeline in Bayonne, New Jersey.

On the basis of the inspection, PHMSA has identified the apparent inadequacies within IMTT's plans or procedures, as described below:

1. §191.15 Transmission and gathering systems: Incident Report

§191.15(b) Where additional related information is obtained after a report is submitted under paragraph (a) of this section, the operator shall make a supplemental report as soon as practicable with a clear reference by date and subject to the original report

IMTT - Pipeline procedures do not address filing a supplemental report, if needed, in conjunction with filing original NRC reports.

2. §195.310 Records

§195.310(b)(10) Temperature of the test medium or pipe during the test period

Recording of temperature during a pipeline pressure test is not in IMTT - Pipeline procedures. Temperatures are recorded on actual IMTT-Pipeline test reports.
