West Trenton, NJ 08628

RE: CPF 1-2011-1007M

Dear Mr. Coy,

This letter is the formal response by Dominion Transmission, Inc. (DTI) to the Notice of Amendment dated May 23, 2011 stating:

On the basis of the inspection, PHMSA has identified the apparent inadequacy found within DTI’s plans or procedures, as described below:

1. § 192.605 Procedural manual for operations, maintenance, and emergencies.

(b) Maintenance and normal operations. The manual required by paragraph (a) of this section must include procedures for the following, if applicable, to provide safety during maintenance and operations.

(7) Starting, operating and shutting down gas compressor units.

At the time of the NYSDPS inspection, DTI had no startup, operating or shutdown procedures at the Woodhull compressor station specifically for gas Compressor Unit 7 and Unit 8 at the Woodhull Compressor Station, in Woodhull, NY as required by DTI Work Procedure OQ-001-G, page 4, step 5; and, by DTI Standard Operating Procedure (SOP) 16, Section 60.

DTI must prepare procedures covering the areas noted above.
Mr. Byron Coy, Jr.

**DTI Response:**

To address the concerns raised in the Notice, DTI has modified the Woodhull Station Task and Step Manual to accurately reflect the operation of Units 7 and 8. For your reference, the revised Manual is included in this correspondence.

If you have any questions, or should require additional information, please do not hesitate to contact Shawn Miller at (304) 627-3404.

Respectfully,

[Signature]
