CPF 1-2017-1008M

Dear Mr. Cluff:

From December 15 to 18, 2015; a representative from the Pipeline and Hazardous Materials Safety Administration, Office of Pipeline Safety, pursuant to Chapter 601 of 49 United States Code, conducted an on-site pipeline safety inspection of Williams Field Services Company, LLC's (Williams) written specifications and records for the construction of an interstate ethane pipeline system, known as the Ohio Valley Midstream, in Pittsburgh, Pennsylvania. As a result of the inspection, Williams was issued a Notice of Amendment (NOA) on March 23, 2017, which proposed amendments to its written specifications.

Williams submitted its amended written specifications on July 26, 2017. My staff reviewed the amended written specifications, and it appears that the inadequacies outlined in the NOA have been corrected.

This letter is to inform you no further action is necessary and this case is now closed. Thank you for your cooperation.

Sincerely,

Robert Burrough
Acting Director, Eastern Region
Pipeline and Hazardous Materials Safety Administration
