Dear Mr. Hoferlin:

From November 6-8, 2018, a representative of the Pipeline and Hazardous Materials Safety Administration (PHMSA) pursuant to Chapter 601 of 49 United States Code inspected Spire Missouri Inc. East's (Spire) procedures for Functional Integrity of Underground Natural Gas Storage in St. Louis, Missouri. As a result of the inspection, Spire was issued a Notice of Amendment on May 30, 2019, which proposed amendment of your procedures.

Spire submitted its amended procedures on or about August 1, 2019. My staff reviewed the amended procedures, and it appears that the inadequacies outlined in this Notice of Amendment have been corrected.

This letter is to inform you no further action is necessary and this case is now closed. Thank you for your cooperation.

Sincerely,

Robert Burrough  
Director, Eastern Region  
Pipeline and Hazardous Materials Safety Administration
