Mr. Robert Burrough  
Director  
PHMSA Eastern Region  
840 Bear Tavern Road, Suite 300  
West Trenton, NJ 08628  
CPF 1-2019-6006

Dear Mr. Burrough,

Please find enclosed Delaware Storage & Pipeline Company's Standard Operating Procedure titled "Siemens Leak Detection System" which was modified in response to the Notice of Probable Violation and Proposed Compliance Order CPF 1-2019-6006. Delaware Storage & Pipeline Company has included calibration information for the temperature sensors on the system as well as recordkeeping information. Additionally, Delaware Storage & Pipeline Company has entered into a contract with Siemens USA, the manufacturer of the onsite Leak Detection System to calibrate the system within 180 days of this Notice. This contract is to provide a qualified individual to provide calibration and documentation of said calibration of the leak detection system on site.

This modification and action will resolve the inadequacies found with Delaware Storage & Pipeline Company's Leak Detection System's Standard Operating Procedures and Records in accordance with 49 CFR Part 195 and API RP 1130 requirements and the Pipeline and Hazardous Materials Safety Administration's findings dated May 6, 2019. If you require more in regards to CPF 1-2019-6006, please contact me directly.

Thank you,

Michelle Denault  
Regulatory Compliance Manager  
Delaware Storage & Pipeline Company
