Dear Mr. Johnson:

From November 19 – 22, 2019, inspectors from the California Geologic Energy Management Division (CalGEM), acting as an Agent for the Pipeline and Hazardous Materials Safety Administration (PHMSA) Office of Pipeline Safety (OPS), pursuant to Chapter 601 of 49 United States Code (U.S.C.) inspected Pacific Gas & Electric Company's (PG&E) procedures relevant to its underground natural gas storage program for the Pleasant Creek (PC) and McDonald Island (MI) intrastate underground natural gas storage (UNGS) facilities in San Joaquin and Yolo Counties, California. As a result of the inspection, PG&E was issued a Notice of Amendment on June 12, 2020, which proposed amendment of your procedures.

PG&E submitted its amended procedures on or about July 10, 2020. My staff reviewed the amended procedures, and it appears that the inadequacies outlined in this Notice of Amendment have been corrected.

This letter is to inform you no further action is necessary and this case is now closed. Thank you for your cooperation.

Sincerely,

Robert Burrough  
Director, Eastern Region  
Pipeline and Hazardous Materials Safety Administration
