**CERTIFIED MAIL - RETURN RECEIPT REQUESTED**

April 17, 2012

Mr. Jeffrey W. Gifford  
Vice President, HSSE  
Genesis Energy  
919 Milam, Suite 2100  
Houston, Texas 77002

**CPF 2-2012-6007M**

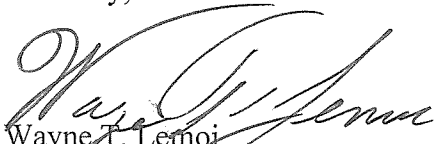

Dear Mr. Gifford:

On February 13-16, 2012, a representative of the Pipeline and Hazardous Materials Safety Administration (PHMSA) inspected the Genesis Pipeline Alabama, LLC (Genesis-AL) Castleberry Pipeline's written operations and maintenance procedures contained in the *Genesis Energy Liquid & CO<sub>2</sub> Operations, Maintenance and Emergency Procedures Manual (LOM&E)*. The LOM&E is used by all Genesis Energy, L.P. companies operating hazardous liquid pipelines regulated by 49 CFR Part 195. The inspection took place in Brewton, Alabama, pursuant to Chapter 601 of 49 United States Code. As a result of the inspection, PHMSA issued a Notice of Amendment (NOA) on March 20, 2012.

The PHMSA Southern Region received your response to the NOA on April 9, 2012. We have reviewed your response, and find Genesis-AL's response adequate. This letter is to inform you that Genesis-AL has complied with the terms of the NOA and that no further action is necessary with regards to the NOA. This case is now closed.

Please be advised that this letter refers only to the NOA (**CPF 2-2012-6007M**) and not to any other PHMSA pending cases. Also be advised that nothing herein states or implies that the LOM&E meets the requirements of the federal pipeline safety regulations or that the LOM&E is approved. The pipeline system and LOM&E remain subject to inspection by PHMSA.

Sincerely,

  
Wayne T. Lemoie  
Director, Office of Pipeline Safety  
PHMSA Southern Region
