Dear Mr. Pankhurst:

On June 18-22, 2012, a representative of the Pipeline and Hazardous Materials Safety Administration (PHMSA), Southern Region, Office of Pipeline Safety inspected the Tri-States NGL Pipeline, LLC (Tri-States) procedures and records at your Moss Point, Mississippi office and pipeline facilities in Alabama, Mississippi, and Louisiana, pursuant to Chapter 601 of 49 United States Code.

As a result of the inspection, it appears that Tri-States has committed a probable violation of the Pipeline Safety Regulations, Title 49, Code of Federal Regulations. The items inspected and the probable violation is:

- 1. §195.412 Inspection of rights-of-way and crossings under navigable waters.
... (b) Except for offshore pipelines, each operator shall, at intervals not exceeding 5 years, inspect each crossing under a navigable waterway to determine the condition of the crossing.**

Tri-States did not inspect each crossing under a navigable waterway to determine the condition of the crossing at intervals not exceeding 5 years. Records reviewed during the inspection showed that the inspection of three crossings under navigable waterways exceeded the 5 year interval required by the regulation. At the time of the inspection Tri-States provided records showing that:

- The Pascagoula River was inspected on September 14, 2005, and November 17, 2010, exceeding the 5 year interval by 2 months and 3 days.
- The Pearl River was inspected on September 29, 2005, and November 16, 2010, exceeding the 5 year interval by 1 month and 18 days.

- Lake Pontchartrain was inspected on September 11, 2005, and October 6, 2010, exceeding the 5 year interval by 25 days.
