FINAL ORDER

On July 22-23, 1996, representatives of the Central Region, Office of Pipeline Safety (OPS), pursuant to Chapter 601 of 49 United States Code, conducted an onsite inspection of the pipeline's and maintenance records and pipeline facilities for your Superior, Wisconsin facility. As a result of the inspection, the Director, Central Region, OPS, issued to Respondent, by letter dated February 24, 1997, a Notice of Probable Violation and Proposed Compliance Order (Notice). In accordance with 49 C.F.R. § 190.207, the Notice proposed finding that Respondent had committed violations of 49 C.F.R. Part 195.402 and proposed that Respondent take certain measures to correct the alleged violation.

Respondent responded to the Notice by letter dated March 26, 1997 (Response). Respondent did not contest the allegations of violation but provided information concerning the corrective actions it has taken.

FINDINGS OF VIOLATION

Respondent did not contest alleged violation of 49 C.F.R. Part 195 in the Notice. Accordingly, I find that Respondent violated the following section of Part 195, as more fully described in the Notice:

49 C.F.R. § 195.402 -- failure to provide adequate written procedures for conducting normal operations and maintenance activities, and handling abnormal operations and emergencies, as required by §§195.402(c), 195.402(d), 195.402(e) and 195.402(f).

This finding of violation will be considered a prior offense in any subsequent enforcement action taken against Respondent.
The Notice proposed a compliance order. Respondent has demonstrated corrective action addressing the items in the proposed compliance order. The Director, Central Region, OPS has accepted these measures as adequately fulfilling the requirements of the regulations and no further action is needed with respect to a compliance order. The terms and conditions of this Final Order are effective upon receipt.
