VIA CERTIFIED MAIL – RETURN RECEIPT REQUESTED

June 5, 2012

Mr. Richard Adams
Vice President, US Operations
Enbridge Energy Partners, L.P.
1100 Louisiana, Suite 3300
Houston, Texas 77002

CPF 3-2008-5011

Dear Mr. Adams:

On August 17, 2010, the Pipeline and Hazardous Safety Administration (PHMSA) issued a Final Order to Enbridge Energy Partners, L.P. (Enbridge) in the above-referenced matter that resulted from an accident that occurred on your 34-inch crude oil pipeline designated as Line 3 on November 28, 2007 downstream of your terminal near Clearbrook, Minnesota. The Final Order included nine specific items that Enbridge was required to complete to ensure its continued compliance with the pipeline safety regulations promulgated in Part 195. Based upon our review of the documentation that Enbridge has provided, it has been determined that the actions required by the Order have been completed.

Accordingly, this case is now closed. Thank you for your cooperation in this matter.

Sincerely,

David Barrett
Director, Central Region
Pipeline and Hazardous Materials Safety Administration
