RE: CPF 4-2018-1013M
Energy Transfer - Notice of Amendment

Dear Ms. McDaniel,

Energy Transfer acknowledges receipt of the referenced PHMSA Notice of Amendment dated October 23, 2018, and received by Energy Transfer on October 29, 2018.

The Notice of Amendment required Energy Transfer to modify its written procedures to add language that ensures that whenever an increase in population density indicates a change in class location for a segment of an existing steel pipeline operating at hoop stress that is more than 40 percent of SMYS, that the operator shall immediately conduct a study as required by §192.609.

Energy Transfer's procedure B.12 "Evaluating Class Location Changes" has been revised to reflect the requested modifications and is enclosed with the added language shown in redline. This revision has also been submitted through our Procedures MOC process.

Should you have any questions or require further information, please contact me at 713-989-7460 or via email at Eric.Amundsen@energytransfer.com.

Sincerely,

Eric Amundsen
Senior Vice President – Operations
