Dear Mr. DeVegvar:

On November 14, 2012, a representative of the Pipeline and Hazardous Materials Safety Administration (PHMSA) pursuant to Chapter 601 of 49 United States Code inspected Greka Energy's procedures for their Public Awareness Program in Santa Maria, California.

On the basis of the inspection, PHMSA has identified the apparent inadequacies found within Greka Energy's Public Awareness procedures, as described below:

**1. § 192.616 Public awareness**

**(c) The operator must follow the general program recommendations, including baseline and supplemental requirements of API RP 1162, unless the operator provides justification in its program or procedural manual as to why compliance with all or certain provisions of the recommended practice is not practicable and not necessary for safety.**

The Greka Energy Public Awareness Program did not include a statement of management support as required by API RP 1162 Section 2.5.

**2. § 192.616 Public awareness**

**(c) The operator must follow the general program recommendations, including baseline and supplemental requirements of API RP 1162, unless the operator provides justification in its program or procedural manual as to why compliance with all or certain provisions of the recommended practice is not practicable and not necessary for safety.**

The Greka Energy Public Awareness Program did not specify a process that specifies the frequency for assessment intervals and an effectiveness evaluation.
