

# Distribution Integrity Management Program

## **The Executive Perspective**

Bill Gute  
Deputy Associate Administrator  
PHMSA/Pipeline Safety

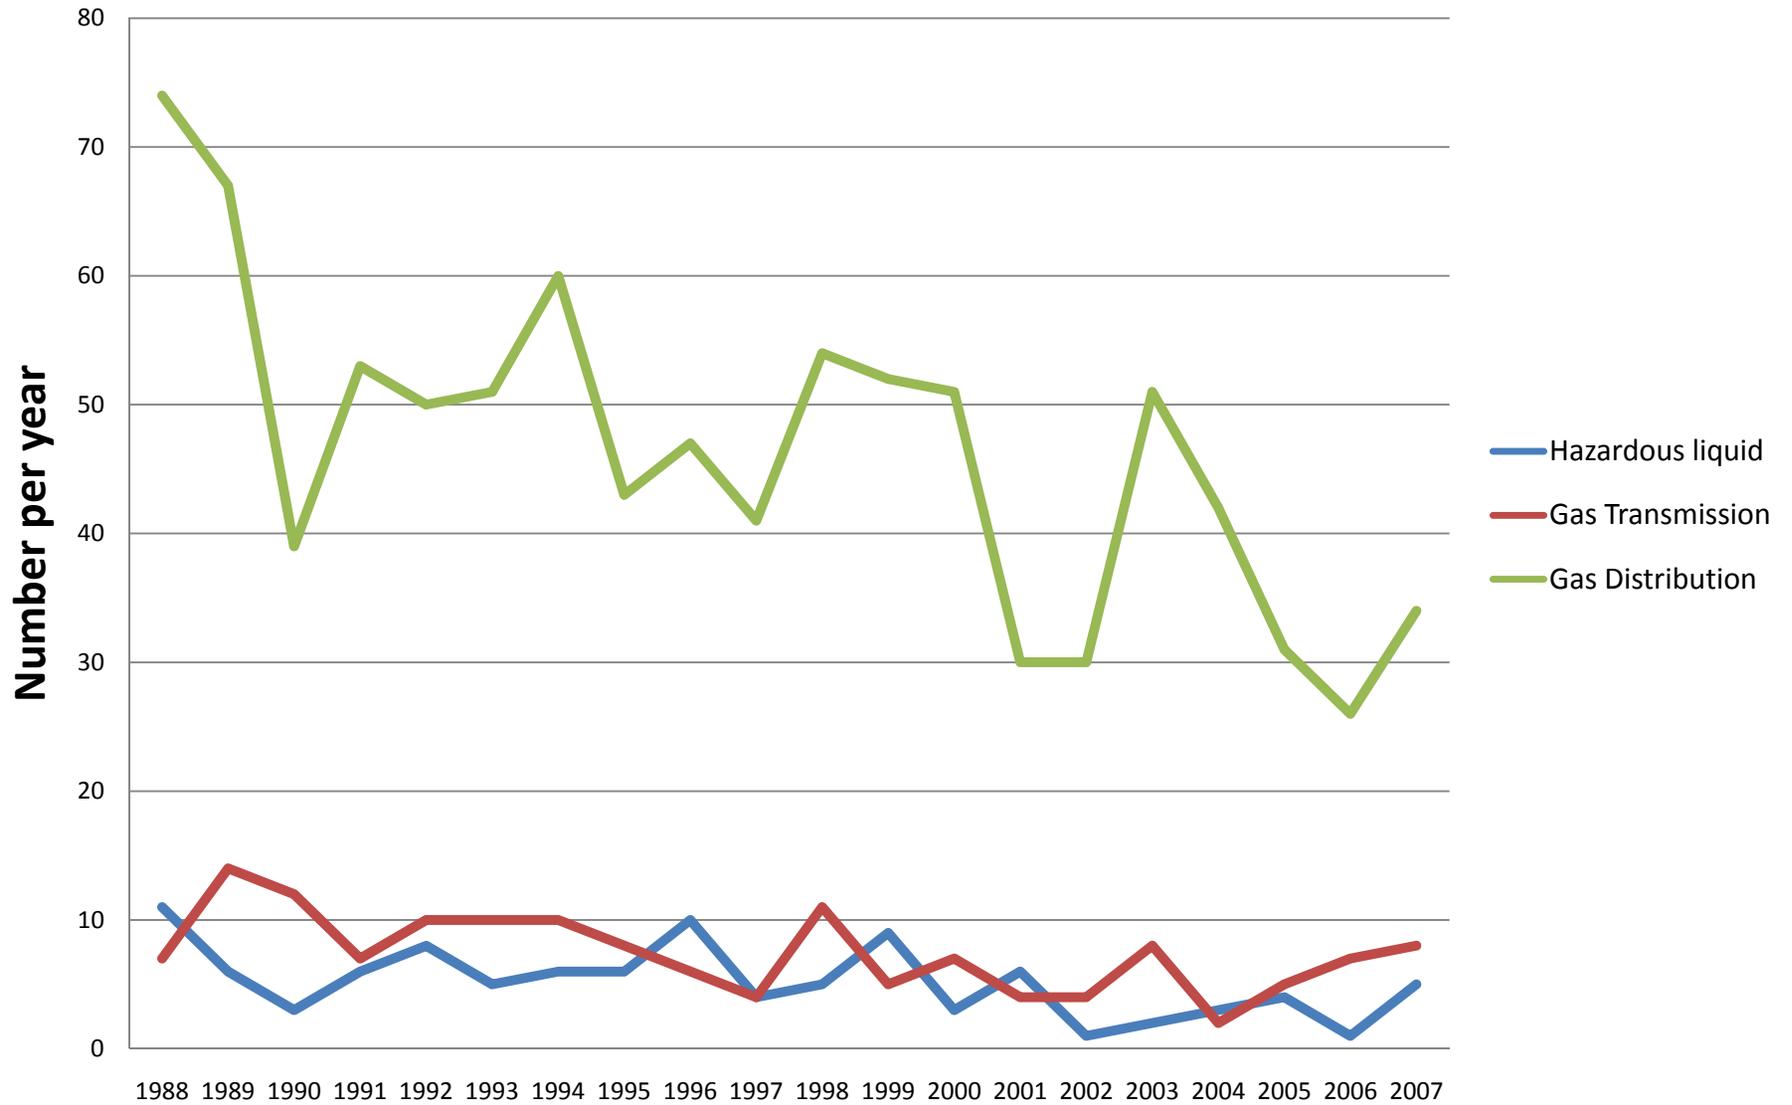

# Improving Safety

- Regulations apply everywhere
- Accidents usually result from local circumstances
- Better focus is needed to reduce accidents efficiently

# Integrity Management

- Integrity Management is focused safety activity
  - Hazardous Liquid Pipelines: 2000
  - Gas Transmission Pipelines: 2003
  - Gas Distribution Pipelines: Now

# Serious Incidents

# Addressing Distribution

- Different than other pipelines
  - Smaller diameters
  - Lower pressures
  - All in populated areas
  - Extensive branching and interconnection
- IM principles apply, but need to be implemented differently
