CPF 1-2008-3001M

Dear Mr. Andreas:

From March 25 to March 28, 2008, representatives of the Pipeline and Hazardous Materials Safety Administration (PHMSA) pursuant to Chapter 601 of 49 United States Code inspected Hopkinton LNG Corporation's (Hopkinton LNG) procedures for remediating external corrosion in Hopkinton, Massachusetts.

On the basis of the inspection, PHMSA has identified the apparent inadequacy found within Hopkinton LNG's plans or procedures, as described below:

1. §193.2637 Remedial measures.

Prompt corrective or remedial action must be taken whenever an operator learns by inspection or otherwise that atmospheric, external, or internal corrosion is not controlled as required by this subpart.

Operator procedures for remediating external corrosion do not specify a time interval for corrective action on galvanic anode system deficiencies.
