Mr. Robert Burrough
Director, PHMSA Eastern Region
840 Bear Tavern Road, Suite 300
West Trenton, NJ 08628

RE: CPF 1-2022-013-NOA

Dear Mr. Burrough,

This letter is in response to the March 22, 2022 Notice of Amendment Letter (Letter) provided to Equitrans Midstream Corporation (Equitrans) by the Pipeline and Hazardous Materials Safety Administration (PHMSA). The following information and associated attachments serve as Equitrans' response to the Letter:

PHMSA Inspection Item No. 1

As a result of the PHMSA inspection, Equitrans Engineering team developed Design and Construction Standards for Underground Gas Storage. The standards incorporate both State and Federal requirements for new well construction, modifications of existing wells and plugging and abandonment of wells within the storage boundaries. The standards were published September 8, 2022, in Equitrans Design and Construction Manual and will be used in all relevant underground gas storage activities moving forward.

Equitrans' number one priority is the safety of the general public, our employees and our pipeline systems. If you have questions or need additional information, please contact me at (412) 395-2971 or GWest@equitransmidstream.com. Thank you for your time.

Sincerely,

Gregg West, Vice President
Environmental, Safety and Compliance
