West Trenton, NJ 08628

RE: Notice of Amendment: CPF 1-2023-034-NOA

Dear Mr. Burrough,

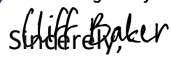

This letter is in response to CPF 1-2023-034-NOA issued to Equitrans Midstream Corporation (ETRN or Equitrans) on April 13, 2023, by the Pipeline and Hazardous Materials Safety Administration (PHMSA) regarding the control room management inspection (CRM) conducted on December 6, 2021, through December 10, 2022 in Canonsburg, Pennsylvania. Equitrans response is as follows:

PHMSA Item No. 1: §192.631 Control Room Management

Equitrans Response No. 1: The Equitrans' *Control Room Management Plan* section 900 – Training references the Equitrans Midstream *Control Room Management Training Plan* (attached). The attached plan covers the details of how the annual training plan review is conducted. Specifically, Page No. 6 of the Equitrans Midstream *Control Room Management Training Plan* section 10.0 (*Changes Affecting the Training Plan*) was revised on February 28, 2022. This revision provides additional detail on how ETRN completes and documents the annual review of the training program. As provided in section 10.0, the plan is reviewed in an annual meeting of gas control, SCADA and compliance representatives. The criteria in paragraph 10.2, which was added to the plan on February 28, 2022, is used to determine if any changes to the plan may be needed. The review team makes recommendations based on the criteria and documents any changes directly in the plan. The training plan content is used by gas control for training the gas controllers. Revisions made to the plan are processed by incorporating the revisions into the control room training. The details of the review are ultimately documented in the "Log of revisions" on page 23 as stated in paragraph 10.3.

Equitrans is confident that these matters have been fully addressed. Please contact Jacob Lyons at (412) 295-3962 or by email at jlyons@equitransmidstream.com if you have any questions or need additional information.
