CERTIFIED MAIL - RETURN RECEIPT REQUESTED

April 2, 2014

Mr. Jason Few
Chief Executive Officer
Seminole Gas Company
1323 E 71st Street, Suite 300
Tulsa, OK 74136

CPF 2-2013-6007M

Dear Mr. Few:

On March 3, 2014, I received your written response to my February 6, 2014, letter to you regarding Seminole's inadequate response to the above referenced Notice of Amendment (NOA); specifically items 6, 10, and 11. In your letter you asked for clarification regarding my February 6, 2014, letter. You state, "*Seminole and your office agreed to and received acknowledgement of...*" certain proposed changes regarding NOA items 6, 10, and 11.

To clarify, my office did not previously agree to, acknowledge, or approve the proposed procedural changes described in your February 21, 2014, letter to me. The federal pipeline safety regulations grant the Associate Administrator for Pipeline Safety the authority to determine if your procedures are adequate. That authority has been delegated to me by the Associate Administrator – it was not granted to an inspector in my region.

Moving forward, we have reviewed all your submittals in response to the NOA and have determined that your responses have complied with the terms of the NOA. No further action is necessary with regards to the NOA. This case is now closed.

While not required by the NOA, in almost all cases operators send us their amended written procedures so that we can fully evaluate the procedures themselves to determine if they appear to be adequate. Since Seminole did not provide us with the actual written procedures, we will be closely evaluating these procedures during our next inspection.

If you have any questions on this or any other pipeline safety issue, please contact my office at (404) 832-1147.

Sincerely,

Wayne T. Lemoi
Director, Office of Pipeline Safety
PHMSA Southern Region
