RE: CPF 3-2025-023-NOA

Dear Mr. Smith:

From October 16 to October 24, 2024, a representative of the Pipeline and Hazardous Materials Safety Administration (PHMSA), pursuant to Chapter 601 of 49 United States Code (U.S.C.), conducted an inspection of Spire Midstream's (Spire) procedures for the highly volatile liquid ("HVL") Laclede / Chouteau Island pipeline in Saint Louis, Missouri. On October 14, 2025, pursuant to 49 CFR § 190.206, PHMSA issued a Notice of Amendment (Notice) which proposed amendment of Spire's procedures.

Spire submitted its amended procedures on November 13, 2025. PHMSA has reviewed the amended procedures, and it appears that the inadequacies outlined in the Notice for Items 1 and 3 have been corrected. With respect to Item 2, Spire provided its Notification of Sale of the NGL Pipeline to Phillips 66 Pipeline, LLC, effective January 1, 2026; therefore, amended procedures per Item 2 are no longer required to be submitted. Accordingly, this letter is to inform you that PHMSA hereby withdraws Item 2 of the Notice. The other Items are now closed.

Sincerely,

David Barrett
Acting Director, Central Region, Office of Pipeline Safety
Pipeline and Hazardous Materials Safety Administration

cc: Mr. Scott Smith, President, Spire Midstream
Mr. Randy Wilson, Director, Pipeline & System Integrity, Spire Missouri Inc. East
