Dear Mr. Correll:

From September 9, 2019 through February 07, 2020, representatives of the Pipeline and Hazardous Materials Safety Administration (PHMSA), pursuant to Chapter 601 of 49 United States Code, inspected Northern Natural Gas Company's (NNGC) operations, maintenance, and emergency procedures for its natural gas transmission pipeline systems located in Texas, New Mexico, and Oklahoma. As a result of the inspection, NNGC was issued a Notice of Amendment on October 30, 2020, which proposed amendment of your procedures.

NNGC submitted its final amended procedures on March 1, 2021. My staff reviewed the amended procedures, and it appears that the inadequacies outlined in this Notice of Amendment have been corrected.

This letter is to inform you no further action is necessary and this case is now closed. Thank you for your cooperation.

Sincerely,

Mary L. McDaniel, P.E.
Director, Southwest Region
Pipeline and Hazardous Materials Safety Administration
