**CPF 5-2022-018-NOA
Closure Letter**

Dear Mr. Collins:

From November 1 through 5, 2021, representatives from the Pipeline and Hazardous Materials Safety Administration (PHMSA), pursuant to chapter 601 of 49 United States Code, conducted an on-site pipeline safety inspection of the written control room management plan, procedures, and records of Western Midstream Partners, LP (Western) in Platteville, Colorado. As a result of the inspection, Western was issued a Notice of Amendment on March 7, 2022, which proposed amendment of your procedures.

Western submitted its amended procedures on April 6, 2022. My staff reviewed the amended procedures, and it appears the inadequacies outlined in this Notice of Amendment have been corrected.

This letter is to inform you no further action is necessary and this case is now closed. Thank you for your cooperation.

Sincerely,

Dustin Hubbard
Director, Western Region
Pipeline and Hazardous Materials Safety Administration
