**CPF 5-2022-051-NOA
Closure Letter**

From April 11 through 15, 2022, representatives of the Pipeline and Hazardous Materials Safety Administration (PHMSA), pursuant to Chapter 601 of 49 United States Code, inspected Elevation Midstream's (Elevation) procedures for control room management in Brighton, Colorado. As a result of the inspection, Elevation was issued a Notice of Amendment (NOA) on December 1, 2022, which proposed amendment of your procedures.

Elevation submitted its amended procedures on September 21, 2022, prior to issuance of PHMSA's NOA. My staff reviewed the amended procedures, and it appears that the inadequacies outlined in this Notice of Amendment have been corrected.

This letter is to inform you no further action is necessary and this case is now closed. Thank you for your cooperation.

Sincerely,

Dustin Hubbard
Director, Western Region
Pipeline and Hazardous Materials Safety Administration
