Contract Number: *DTPH56-08-T-000020*

Prepared for: *Government Agency: DOT and Co-funders: British Petroleum*

Project Title: *Internal Corrosion Detection in Liquids Pipelines*

Prepared by: *Aginova Inc.*

Contact Information: *Dr. Ashok Sabata (ashok@aginova.com and 732-780-7065)*

For quarterly period ending: *August 15, 2010*

List Activities/Deliverables Completed during this reporting period.

## **TECHNICAL STATUS –**

In this report we will summarize the milestones achieved from May 16 to August 15 2010.

### **Ball Design**

Teflon balls manufactured. Complete system assembled.

### **Acoustics for Location**

We have now started testing the complete system with speakers on one end and microphone on the other end.

BP has not yet responded to our request for trial date. As a back up we are looking at locally to test the system maybe inside a swimming pool. Right now the testing is being done in the air. Our plan is to wait for 4 more weeks for BP to respond or we start testing it locally.
