Wyoming Department of Enterprise Technology Services
April 28, 2015 at 2:30pm, Emerson Room 202
TAG Transportation Subcommittee Meeting

Invited: Mary Wilson (BLM), Paul Caffrey (WyGISC), Brian Peel (WYDOT), Ryan Sirdoreus (SPHST), Carrie Guiles (Yellowstone NP), Chris Arneson (PRECorp GIS), Nancy Bohac (ESRI), Rob Aiken (USFS, Region 2), Rich Greenwood (Greenwood Mapping), Rod Bacon (PassWord Inc.), Mark Ransdell (One Call Wyoming), Denyse Wyskup (City of Casper)

Present:

Purpose: To communicate vision and goals among road data stakeholders to develop an approach for the TAG Transportation Subcommittee to develop road data standards

Goals: Develop standards for road data in support of having one statewide road dataset that meets local, state and national standards and to draft report for TAG outlining that approach

Everyone	- Core and common attributes - Brian - including Data Steward ID format / purpose discussion - Start fleshing out draft report - Karen and Brian - Next steps - Agree on common attributes - Any additional topics
Everyone	Next meeting is May 26th at 2:30pm
Action Items	

Mission: To establish and refine a coordinated enterprise information services and technology structure which increases the ability of State agencies to deliver quality cost effective services to the citizens of Wyoming.

Previously settled on this concise definition: "PUBLIC ROAD.—The term "public road" means any road or street under the jurisdiction of and maintained by a public authority and open to public travel."

Focus on public roads right now, down the road consider private roads for emergency response.

Nebraska's road data report.
