Grant Year:	FY 17 – FY 18
AOR name:	Hillary R Browning
Contact Information	(225) 658-7208 richard.browning@la.gov

Narrative

For the first 6 months we ran into some bad construction weather here in Louisiana due to rain which set use back. We had another project they were working on our facility involving hauling dirt from our dirt pit using our Gas City road was also late completing due to rain. We still need one more layer of rock to put down. We have the rock purchased. (Total rock purchased)

We have a construction Manager from the Pipeline Association. He is coordinating with the association members for them to come in with installing of the pipelines and meter stations and inter structural projects. Some of the projects are being built off site for insulation.

The rock for the road is here and will be put down after the heavy equipment is finished

This is how the inside of the buildings. The appliance will leak and the responders will use testing equipment to find where it is leaking

This is one of the Control stations Used to control which prop is receiving gas.

The other control station will control the gas to the burn pits once set in ground.

The students will be able to put out the fire in the burn pits using fire extinguishers.

We spent \$ 48,680.78 in equipment and \$51,000.00 in Supplies for a total of \$99,680.78.

If you have any questions or concerns Please contact me.

Thanks

Richard
