

PHMSA FOA # DTPH5615SN0002 -- Resources, Milestones and Budget NORTH CENTRAL FLORIDA REGIONAL HAZARDOUS MATERIALS RESPONSE TEAM

The North Central Florida Regional Hazardous Materials Response Team has conducted 2 of the 3 tabletop exercises. The third exercise is scheduled for April 14, 2016. The Team has begun work on the outreach materials that will be distributed after the completion of the third tabletop exercise. This is on schedule to be completed before July 1, 2016.

The identification of critical facilities near pipelines has started and is anticipated to be completed on schedule before July 1, 2106. This is to take advantage of a similar project updating the critical facility geodatabase. This is necessary to ensure consistency with similar methodologies for a similar project. . This is on schedule to be completed before July 1, 2016.

The Team has not purchased a pipeline training trailer yet due to the availability of a response trailer being taken out of active response service and available for training. This issue will be resolved in the near future. This delay in purchasing \$`13,660 in supplies will allow us to avoid duplicating what is now an available resource of a trailer. . This is anticipated to be completed before July 1, 2016.

The next Regional Hazmat Team Board meeting is scheduled for May 26, 2016, and it is anticipated that the Policy Board will authorize invoicing for the three \$6,000 tabletop exercise. The trailer issue and the associated training equipment should be purchased by this time also.

Thanks for your assistance with this and advise if there is more I need to do.
